

List of Freshwater Fishes from Argentina - Update 13.

Stefan Koerber

Friesenstr. 11, 45476 Muelheim, Germany, pecesciollos@koerber-germany.de

The aim of this list of species of freshwater fishes from Argentina is to provide an updated supplement to the 'Lista comentada de los peces continentales de la Argentina' published by López et al. (2003). Only those species are listed here that have not been included in that paper or which have undergone systematical changes since then. This list is not a publication in the sense of the 'Code' (ICZN) and expressions as 'new species', 'new combination' etc. are only used to highlight changes in comparison with the list of López et al. Supergeneric classifications follow Reis et al. (2003) and Miranda (2009). 'NEW' after species names indicates that this record has not been included in previously published updates.
